In the event of non-compliance with any of the provisions of Rule 20.1, and unless the arbitrators in their absolute discretion determine otherwise, claims shall be deemed to be waived and absolutely barred.

20.3 String arbitration

In the event that a Party claims that the contract forms part of a string of contracts which are subject to these Contract Rules and are in all relevant material points identical in terms except as to price, any arbitration for quality and/or condition may be held between the first Seller and the last Buyer in the string as though they were the only contracting Parties, provided that every Party against whom arbitration is claimed and who in turn claims to be in the string, shall have supplied copies of his contract, the invoice and the Declaration of Shipment as well as any other relevant information required by the Arbitrators.

Any arbitration under this Rule shall be conducted in the language of the contract agreed between the first Seller and first Buyer pursuant to Rule 1.3.

The Arbitrators shall at their absolute discretion decide whether such contracts constitute a string for the purpose of this Rule.

Any award so made by the arbitrators shall, subject to the right of appeal available under the FCC Arbitration and Appeal Rules be binding on all Parties in the string and may be enforced by any Party in the string against his immediate contracting Party as though a separate award had been made under each contract.

20.4 Loss of rights to be in a string

Either Party to the contract shall be entitled to draw sealed samples as aforesaid but by doing so he shall relinquish any rights to be in a string as specified in Rule 20.3. This provision does not apply to the first Seller or last Buyer in a string.

PART 4 – SAMPLING PROCEDURE FOR ARBITRATION PURPOSES

21. APPLICABILITY

Parties may agree at the time of entering into the contract upon the applicable sampling procedures for the purposes of quality determination in accordance with Rule 15.2.1 or Rule 15.2.2 as appropriate. Unless otherwise agreed between the parties, for disputes referred to FCC Arbitration only samples prepared in accordance with the following procedures will be permitted. Under these Rules only cocoa products packed in sound Packaging Units up to a maximum weight of 1200kg may be sampled.

22. DEFINITIONS

22.1 Consignment

Means a container (1 teu or 2 teu, as appropriate) of Packaging Units.

22.2 Primary Sample

Means a quantity of cocoa product of not less than 50g drawn from a Packaging Unit.

22.3 Composite Sample

Means a sample of a minimum of 150g (or such larger quantity as may be required in accordance with standard recognised analytical tests for the identified defective(s) upon which the claim for arbitration is based) and formed from the homogenous mixing of Primary Samples drawn from and representative of each selected Packaging Unit and which will be used for the purposes of assessing the quality of the Consignment against the contract specification.

22.4 Packaging Unit

Means a single package containing a quantity of cocoa product.

22.5 Production or Lot

Means the unique identification assigned to a number of Packaging Units produced from a single operation.

22.6 Defectives

Means those aspects of the quality which, on analysis of a Composite Sample prepared from Primary Samples which have been drawn from the Consignment in accordance with the Sampling Plan, are found not to be in accordance with the contract specification.

23. APPARATUS AND MATERIALS OF SAMPLING

Sampling instruments, apparatus and sample containers shall be clean (and where appropriate sterilised), dry and made of materials which are chemically and microbiologically inert to the product being sampled.

After samples have been drawn, the Packaging Units must be securely and hygienically resealed and repaired as necessary and clearly marked to show that the unit has been subject to sampling. Samples and the corresponding Packaging Units must be clearly labelled in this respect in order to ensure traceability of the sample and the date and place of sampling and the name of the sampler.

24. SAMPLING PLAN

A Composite Sample shall be taken for each separate Production or Lot loaded in one Consignment. Unless otherwise agreed, the costs of sampling and analysis for a maximum of 2 samples per Consignment shall be for the account of the Buyer; the costs of any subsequent sample(s) shall be for the account of the Seller.

The number of Packaging Units from which the Primary Samples are to be taken, shall be the square root of the total number of Packaging Units with the same Production or Lot loaded in one Consignment, rounded up to the nearest whole number. All Primary Samples shall be combined to form a Composite Sample which shall be used for the purpose of assessing the quality of that specific Production or Lot.

For Packaging Units weighing up to and including 50kg net per unit, 1 Primary Sample shall be drawn from each of the Packaging Units, selected at random.

For Packaging Units weighing more than 50kg net per unit, 3 Primary Samples shall be drawn from each Packaging Unit, selected at random. The samples shall be drawn from the top, centre and bottom of each Packaging Unit.

The weight of each Primary Sample shall be a minimum of 50g and shall be sufficient to form a Composite Sample of a minimum of 150g (or such larger quantity as may be required in accordance with the standard recognised analytical tests for the identified Defectives upon which the claim for arbitration is based.

All Primary Samples taken from one Production or Lot shall form the Composite Sample representing the quality of the respective Production or Lot.
